LOW LEVEL SECURITY

TURNLOCK 150.

THE **VERSATILE FULL-HEIGHT** TURNSTILE

Rugged enough for outdoor use, yet attractive enough for interior applications, the Turnlock 150 is a versatile full height security solution for companies looking to mitigate tailgating at various areas of their buildings. Full height turnstiles have a similar mode of operation to a revolving door, therefore providing effective low level security for both inside and outside areas.

OVERVIEW

Whether at a university, transit terminal, or manufacturing facility, the Turnlock 150 is capable of deterring unauthorized entry. Traffic flow is two-way, in one direction at a time; users must stop and wait their turn before proceeding through the turnstile. With a variety of choices when it comes to the number of rotors and the option to create a space-saving, double-entry solution – this turnstile remains a best-seller within the product range.

SILENT, SECURE AND SUSTAINABLE

The beauty of the Turnlock 150 full height turnstile is that it can be used indoors or outdoors. The entrance operates silently in a reliable way and can be integrated with virtually any access control systems to allow only one person per authorized credential. Its tall stature is also a deterrent against casual attempts at intrusion. The low noise and low energy consumption make this a sustainable choice for the environmentally aware security manager.

CONTROL YOUR ACCESS. STEP UP YOUR SECURITY LEVEL

The Turnlock 150 has the option of a universal access control panel known as BoonTouch. This feature allows remote operation and management of the secure entry point from a reception or security desk at the push of a button. This user-friendly interface allows each entry to be operated individually or simultaneously – as the situation demands and shows any security breach instantly. The control panel can operate any combination of up to 6 security access solutions and is compatible with most of the solutions in our product range.

KEY FEATURES

- Premium, aluminum finish
- Heavy-duty construction
- Smooth rotation
- Easy installation and field-configurable
- Mechanical or electrical operation
- Multi-functional unit for various applications
- Additional flexible options available to fine-tune or 'Level Up'

KEY BENEFITS

- Aesthetics suit both indoor and outdoor applications
- Capable of operating under abusive conditions
- Minimal maintenance
- Low energy consumption
- Quiet operation
- Easy to re-configure in the field

SUGGESTED SEGMENTS

- Manufacturing
- Industrial
- Education
- Transit terminals
- Leisure / recreation
- Corporate offices

PUTTING THE POWER BACK IN YOUR HANDS

One size does not fit all, and that is why we at Boon Edam believe in offering modular solutions. This approach allows the security professional to design a tailored entrance solution that balances security and safety with aesthetics.

The result is a unique entrance that fits the needs of each industry, application and individual company. To get started, choose from an array of quality standard options. Then, 'Level Up' where it matters most to your company – whether that be in terms of throughput, security, safety, aesthetics, technology or user comfort – or a combination of each. A modular solution approach truly puts the power back into your hands - the power to create a refined entry with ease.

SCALABLE FLEXIBILITY IS THE FUTURE

The ability to integrate a large variety of secondary security technologies into our full height turnstiles is the ideal way in which to fine-tune by 'Leveling Up' their entrance security when increased protection is required..

Meeting your security goal easily and within your budget is the reason why we work together with you to ensure that by using these options, you end up with a product that outperforms the others safely, beautifully and profitably.

You can level up in any of these categories:

- THROUGHPUT
- SECURITY
- SAFETY
- AESTHETICS
- TECHNOLOGY
- COMFORT
- SERVICE

LEVEL UP

If our standard specifications do not quite suit your needs, we open up opportunities for you to 'Level Up' where it counts most. You can also do this according to your most motivating value driver.

The specification table shows you our standard product options, and to the right of these, you can easily see, and consider, any compatible 'Level Up' options for fine-tuning the Turnlock 150.

TECHNICAL SPECIFICATIONS

 THROUGHPUT	STANDARD	LEVEL UP OPTIONS

WORKING PRINCIPLE

TECHNICAL DIMENSIONS

SERVICE AND MAINTENANCE

With hundreds or thousands of visitors passing through an entry every day, continued and reliable operation is vital. Regular service and maintenance can prevent unexpected hardware breakdowns. Boon Edam's service and maintenance teams across the world are experienced in the effects the local conditions have on the wear and tear of your entry solutions and can offer specialized service and maintenance contracts that correspond to those conditions perfectly.

COMPLIANCE

The goal of an organization is to safeguard the valuable assets inside – both people and property. As is often the case, industries must comply with relevant local and global laws, policies and regulations, to achieve the important goal of overall safety and security. Failure to meet the appropriate measures and criteria set out in these regulations could result in catastrophic incidents and substantial fines.

Boon Edam security entrances are trusted solutions that allow organizations to meet compliance regulations related to restricting access to areas within a building. We take compliance and safety very seriously and ensure that our products are manufactured, installed and maintained to keep up the strict criteria required in all our countries. We are always improving and always committed to making sure our products are compliant and certified. More information can be found on our website under 'Our Responsibility'.

The Turnlock 150 complies with the following American standards:

- UL standard 294
- CAN/ULC standard S319

OUR REACH IS GLOBAL.

We have been in business for more than 140 years manufacturing premium aesthetic and security entrance solutions in the Netherlands, United States of America and China. We can confidently say that we cover every corner of the globe with subsidiary companies in major cities across the globe. Furthermore our global export division not only partner with our distributors, but also offer direct sales and service to every territory. This wide net allows us to have a strong global footprint as well as a personal grasp of local markets and their unique entry requirements.
